## SUPPLEMENTAL ALLOWANCE

### *Allowable Subject Matter*

1. Claims 1-17, 19-21, 25-36, 38-48 and 50 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record, either singly or in combination, fails to disclose the limitations of: multiple chemical deposition cycles deposition, a silicon layer of a thickness of more than one monolayer on a plurality of substrates in a hot wall batch process chamber by exposing the substrates to a **supply of trisilane**; interrupting the supply of trisilane; forming a silicon compound layer by exposing the silicon layer to a reactive species after interrupting the supply, wherein the silicon compound layer has a thickness non-uniformity of about 5% or less and a step coverage of about 80% or greater, and **further comprising repeating depositing, interrupted and forming in a plurality of cycles.**

There is prior art that shows depositing a dielectric layer using tri-silane as the source gas. However, due to applicant's declaration, that one of ordinary skill would not think to use tri-silane source gas in a cyclical deposition (ald, ale or cld) process to form thin uniform layer because of the high reactivity of tri-silane, and a lack of prior art showing the bold and underlined limitation the examiner allowed the case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
